

Postdoctoral position in radioligand therapy of multiorgan metastasis of cancer

Faculty of Medicine, [University of Helsinki](https://www.helsinki.fi/en/university-of-helsinki), Helsinki, Finland

We are seeking a post-doctoral fellow to join a consortium project focused on the development of new radioligands for targeted the treatment of triple-negative breast cancer and its multiorgan metastasis including asymptomatic brain metastasis. Successful candidate will be a highly motivated researcher with a strong track record and expertise in cell and molecular biology techniques, biochemistry, and in in vivo models and imaging. Experience in tumor biology is highly desirable and will be considered a significant asset.

The position will be filled from 1 September 2026 or when a suitable candidate has been found, initially for two years with the possibility of extension.

For inquiries, please contact Prof. Pirjo Laakkonen (pirjo.laakkonen@helsinki.fi) or Associate Prof. Mirkka Sarparanta (mirkka.sarparanta@helsinki.fi)
