Pre-Clinical Imaging Lead Scientist

We have an exciting opportunity for a Pre-Clinical Imaging Scientist to join our Pre-Clinical Imaging Facility at the University of Oxford.

Our Pre-Clinical Imaging Facility provides technical and scientific support for users of a broad range of scanning modalities including MRI, PET/SPECT/CT, luminescence and ultrasound.

This is a full-time position with a 5-year fixed term in the first instance.

The successful candidate will play a leading role in managing the pre-clinical imaging facility and its team and will report to the Director of Biomedical Services.

The postholder will have responsibility for the implementation of the strategic development of the imaging facility as defined by an Academic Steering Group. The Pre-Clinical Imaging Lead Scientist will be an internationally recognized authority in their field, with primary responsibility for the successful delivery of research projects, as well as maintaining collaborations and developing the commercial activity of the imaging facility.

It is essential that you hold a PhD/DPhil in a relevant subject, e.g., biomedical sciences, biomedical imaging, radiopharmacy. Have extensive experience of PET/SPECT/CT imaging techniques and equipment, including experience of quality control, maintenance and management.

You will also have a demonstrable ability to lead and motive a team of research staff as well as experience of complex financial management. Excellent communication and presentation skills are essential..

If you are interested in this role and would like more information, please contact Damian Tyler at damian.tyler@cardiov.ox.ac.uk

Applications should be made online. The closing date for applications is 12.00 noon on the 10th May 2024. Interviews are expected to take place on the 23rd May 2024.
